

LABORATORY OBSERVATION / RECORD

Course: Full Stack Web Development

Student Name: Y.Abhishek

Course Code: 23CM4121

Roll No.: A24126552127

Experiment No.: 1

Date: 02 – 08 – 2006

1. TITLE

Design a College Information Portal Using HTML5 Semantic Elements, Multimedia, Tables, and Forms

2. AIM

To design and develop a comprehensive College Information Portal web page for ANITS utilizing HTML5 semantic structural elements, text formatting, ordered and unordered lists, tables, embedded multimedia (audio and video), and HTML5 form elements.

3. OBJECTIVE

The objectives of this experiment are:

- To understand and use HTML5 semantic tags (`<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, and `<footer>`) for document structuring.
- To format textual content using HTML formatting tags (`<b>`, `<i>`, `<u>`, `<strong>`, `<em>`, `<sub>`, and `<sup>`).
- To implement unordered (`<ul>`) and ordered (`<ol>`) lists for curriculum and admission procedures.
- To display structured tabular records using HTML `<table>`, `<thead>`, `<tbody>`, `<tr>`, `<th>`, and `<td>`.
- To embed native HTML5 multimedia elements using `<audio controls>` and `<video controls>` without third-party plugins.
- To develop a student registration form incorporating HTML5 input types (text, email, password, date, number, color, range, radio, checkbox, select, and textarea).

4. THEORY

HTML5 Semantic Architecture — Semantic HTML tags such as `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, and `<footer>` convey explicit meaning to both web browsers and search engine indexers. Unlike generic `<div>` containers, semantic elements improve document outline accessibility, reader comprehension, and screen reader parsing.

Text Formatting & Typography — HTML provides semantic text elements: `<b>` and `<strong>` indicate typographic prominence, `<i>` and `<em>` emphasize context, `<u>` denotes underlines, `<sub>` formats chemical formulations (e.g., H₂O), and `<sup>` represents mathematical exponents (10¹²) and ordinals (1st).

Lists and Data Tables — Unordered lists (`<ul>`) render bulleted lists for non-sequential data, while ordered lists (`<ol>`) outline sequential procedural steps. HTML tables structure multidimensional data into rows (`<tr>`), header columns (`<th>`), and data cells (`<td>`), grouped into `<thead>` and `<tbody>` sections.

Native HTML5 Multimedia — The `<audio>` and `<video>` tags eliminate reliance on legacy browser extensions. Supplying the controls attribute exposes browser-native play, pause, seek, and volume interfaces, while nested `<source>` tags enable multi-format fallback support.

HTML5 Web Forms — Modern form elements provide browser-level client validation. Types like email ensure proper address syntax, date renders localized date pickers, number constrains numerical ranges, color provides a graphical palette selector, and range renders an interactive sliding widget.

5. ALGORITHM / PROCEDURE

1. Create the HTML document file named College-Information-Portal.html.
2. Define the document structure with standard `<!DOCTYPE html>`, `<html lang="en">`, and `<head>` with responsive meta viewport tags.
3. In `<header>`, place the institutional logo with alt text, college title, autonomous status, and NAAC/NBA accreditation details.
4. Implement a semantic `<nav>` containing anchor hyperlinks linking smoothly to page sections (`#about`, `#academics`, `#records`, `#campus-media`, `#registration`) and an external college link.
5. In section `#about`, write the institutional background using `<b>`, `<i>`, `<u>`, `<sub>` for chemical formulas, and `<sup>` for mathematical notations, alongside campus imagery.
6. In section `#academics`, create an unordered list (`<ul>`) of B.Tech disciplines and an ordered list (`<ol>`) detailing the four-stage AP EAPCET admission procedure.
7. In section `#records`, construct an HTML `<table>` displaying student records with Roll Number, Name, Department, Institutional Email, and CGPA, highlighting student Abhishek.
8. In section `#campus-media`, embed native HTML5 `<audio controls>` with audio sources and an HTML5 `<video controls>` virtual tour player with poster preview.
9. In section `#registration`, create a complete student admission form utilizing text, email, password, date, number, color, range, radio, checkbox, select, and textarea elements.
10. Add a semantic `<footer>` containing postal address, contact credentials, and copyright information.
11. Open College-Information-Portal.html in Google Chrome or Microsoft Edge, test all interactive elements, fill the form, and verify rendering against test cases.

6. PROGRAM

College-Information-Portal.html

```

7. CODE EXPLANATION

Code Construct / Element	Technical Explanation
<code><header></code>	Defines the introductory institutional banner containing the logo, crest, and accreditation titles.
<code><nav></code>	Encapsulates intra-page navigation anchor hyperlinks for seamless section jumping.
<code></code> , <code><i></code> , <code><u></code>	Applies bold weight, italic emphasis, and underline styling to key institutional terms.
<code><sub></code> , <code><sup></code>	Renders chemical subscripts (H2O) and mathematical superscripts / ordinal ranks (10 ¹² , 1 st).
<code></code> , <code></code>	Constructs unordered bulleted lists for academic branches and ordered numbered lists for admission steps.
<code><table></code> , <code><thead></code> , <code><tbody></code>	Structures student directory data into organized rows (<code><tr></code>), headers (<code><th></code>), and cells (<code><td></code>).
<code><audio controls></code>	Embeds native browser audio playback controls for the ANITS anthem and chimes.
<code><video controls></code>	Renders a native HTML5 video player with poster preview for the virtual campus infrastructure tour.
<code><input type='email'></code>	Enforces client-side validation ensuring inputs conform to valid email syntax.
<code><input type='date'></code>	Displays a native calendar picker widget for capturing date of birth.
<code><input type='color'></code>	Invokes a graphical color palette picker for user portal theme customization.
<code><input type='range'></code>	Renders an adjustable horizontal slider widget for numerical self-assessment (0 to 100).
<code><fieldset></code> , <code><legend></code>	Groups related input fields with an accessible visual border and descriptive group title.
<code><footer></code>	Represents the closing semantic block containing institutional contact details and copyright.

8. TEST CASES AND EXECUTION DATA

Test Case	Input / Action	Expected Result	Actual Result	Status
TC-01	Open College-Information-Portal.html in browser	Header, nav, sections, and footer render cleanly	All semantic sections displayed with proper layout	Pass
TC-02	Click on #academics navigation hyperlink	Browser view jumps smoothly to Academic Programs	View scrolled directly to targeted section	Pass
TC-03	Inspect chemical formula & ordinal text	H2O rendered with subscript; 1st with superscript	Subscript and superscript displayed accurately	Pass
TC-04	Click Play on College Audio Anthem	Audio playback starts and playback bar advances	Audio player successfully played audio chimes	Pass
TC-05	Click Play on Campus Virtual Tour Video	Video stream renders with playback controls and audio	HTML5 video stream played smoothly with controls	Pass
TC-06	Submit form without required Full Name	Browser blocks submission with validation tooltip	Submission prevented; tooltip prompted to fill field	Pass
TC-07	Input invalid email format (e.g. 'test')	Browser alerts invalid email address format	Validation error displayed requiring '@' symbol	Pass
TC-08	Adjust Color Picker and Range Slider	Color picker opens palette; range slider adjusts value	Color picker and range slider functioned smoothly	Pass
TC-09	Click 'Clear Form' reset button	All form fields revert to initial blank/default states	Form cleared and inputs successfully restored	Pass

Test Case Execution Screenshots & Verification Evidence:

TC-01: Institutional Branding, Header & Navigation Bar Verification

Action / Input: Load portal homepage and inspect header crest, titles, and navigation links.

Expected: ANITS crest, affiliation credentials, and horizontal navigation bar render cleanly.

Observed: All header titles, crest logo, and anchor hyperlinks displayed in top viewport. | Status: **PASS**

TC-02: Academic Programs (Unordered List) & Admission Steps (Ordered List)

Action / Input: Scroll to Academic Programs & Admissions section in main viewport.

Expected: 8 B.Tech disciplines displayed as bulleted list; 4-stage AP EAPCET admission procedure rendered as numbered sequence.

Observed: B.Tech branches and 4 admission steps rendered with correct list hierarchy. | Status: **PASS**

TC-03: Enrolled Student Directory Table Verification

Action / Input: Inspect the structured HTML student records table.
Expected: Tabular layout with navy header, white text, and student records featuring Abhishek (A24126552127) and peers.
Observed: Directory table displayed zebra-striped records with bold student details. | Status: **PASS**

321126510001	K. Sai Verma	Computer Science & Engineering	saiverma.k@anits.edu.in	8.85
321126512015	P. Lakshmi Prasanna	Electronics & Communication	lakshmi.p@anits.edu.in	9.12
321126520042	R. Tarun Kumar	Mechanical Engineering	tarunkumar.r@anits.edu.in	8.24
321126508018	S. Divya Sri	Civil Engineering	divyasri.s@anits.edu.in	8.50

Campus Gallery & Virtual Media

College Audio Anthem & Chimes

Listen to the official ANITS institutional anthem and campus chimes:

Virtual Campus Infrastructure Tour (HTML5 Video)

Watch an overview of campus laboratories, library, and central computing facilities:

TC-04: Embedded Multimedia (Audio Anthem & HTML5 Video Virtual Tour)

Action / Input: Verify HTML5 native audio and video player elements.
Expected: College anthem audio player with controls and virtual campus infrastructure video player with poster preview rendered.
Observed: Native audio and video players loaded with browser-standard playback controls. | Status: **PASS**

Student Online Registration Portal

Prospective applicants are requested to submit their credentials below:

Candidate Enrollment Form

Full Name (as per SSC):

Personal / Official Email:

Account Password:

Date of Birth:

TC-05: Student Admission Registration Form with Live Input Data

Action / Input: Fill registration form with candidate data, pick color, adjust range slider, select branch, and choose extra-curricular checkboxes.

Expected: All modern HTML5 controls accept input and display valid state; submit and clear buttons active.

Observed: Form rendered with live candidate entries, styled inputs, and active buttons. | Status: **PASS**

ACCOUNT PASSWORD:

Date of Birth:
12-12-2006

Applicant Age:
